About the artworks: Each piece of artwork is a unique, handmade creation. The base cards are printed using offset printing with high-quality inks on chemically stable paper. The works are coated with a non-yellowing, protective varnish. To protect the collages, it is recommended that you either keep them out of direct sunlight or frame them with UV-protective glass. Each collage is signed, dated, and labeled with the artist's name on the back. The back usually contains a thematic legend explaining the depicted geological layers.
